

## Conflux

The ultimate virtual platform for events, learning, and more

**Service Introduction:** Conflux is a powerful platform offering an immersive and engaging experience for many types of virtual events, including training sessions, conferences, and much more. It's the perfect platform for organizations looking to connect with their audiences and create engaging virtual experiences.

Imagine a conference center with a reception desk, hallways, advertising boards, break-out rooms. Picture yourself sitting at a table with a customer and going through your powerpoint deck. Envision that it felt like you were really there together. Conflux does not replace Zoom or Teams, it works inside of them once you fire up the room. Conflux has both online and offline learning environment capabilities. Visualize a prospect wanting to review the deck you previously went through. Instead of sending the deck to the client again, with Conflux you give them a log-in that they can use to revisit it – and you'll know that they did so.

Secondly, with Conflux you can continue to load up more reports, more presentations and more of everything – your prospects and customers will have one place to go get to your reference materials.

### HighLights:

- LMS Lite - LMS stands for Learning Management System. Conflux is a SaaS application that allows organizations to manage, host, and track learning or training programs.
- Whether you're organizing an educational webinar, a corporate conference or a virtual event, Conflux offers a highly customizable and user-friendly platform that caters to most needs.
- A comprehensive user management system.
- With its intuitive interface, you can easily set-up and manage your virtual space and interact with your attendees in real time.

**Service Overview:** The key to conflux is its flexibility. You can use it for various purposes such as hosting meetings, training sessions, virtual trade meetings or

social events. Additionally with its advanced networking capabilities, you can easily connect with other attendees and build meaningful relationships.

With Conflux, you get access to a range of advanced tools that allow you to customize your virtual environment to match your unique branding and style. From custom backgrounds to personalized chatbots, Conflux offers endless possibilities to create a unique and unforgettable virtual experience.

Conflux is the perfect platform for businesses, schools and organizations looking to connect with their audiences and create engaging virtual experiences.

The ultimate solution for your virtual event and learning needs has a name – Conflux!
