Migration Acceleration Program (MAP)

Service Introduction: With MAP you can get up to $60,000 of AWS investment for your Proof-of-Concept (POC) project with TCC. Further – once your POC turns into a mobilization project where we plan, prepare and test for your migration – we can help you get up to another $400,000 in AWS free investment.

MAP supports both Migration and Modernization opportunities and provides incentives to modernize workloads coming in from outside of AWS to AWS. MAP Modernization also allows customers to move workloads or applications from On-Premises or Other cloud directly to AWS cloud native. This will generally require customers to refactor or re-platform – TCC does both.

Return on investment: MAP helps organizations achieve a faster return on investment and time-to-value.

HighLights:

- The Assess phase can encompass a discovery of the customer's source workloads, cost analysis of staying on the current environment compared to the expected cost on AWS, a recommendation of the migration/modernization pattern, or a business case to motivate the decision to migrate or modernize.

- The Mobilize phase includes planning, preparing, and enabling the customer for their migration or modernization to AWS, and may include pilot migrations to AWS.

- The Migrate & Modernize phase includes execution of the customer's migration or modernization project. A successfully completed Migrate & Modernize engagement includes timely completion of the expected deliverables, realization of the expected post-migration of the intended business objectives.

Service Overview: MAP is a strategic program designed to support customers with migrations to the AWS Cloud through a proven methodology,

tooling, and incentives. The AWS Migration Acceleration Program (MAP) is a comprehensive and proven cloud migration program based upon AWS's experience migrating thousands of enterprise customers to the cloud. Enterprise migrations can be complex and time-consuming, but MAP can help you accelerate your cloud migration and modernization journey with an outcome-driven methodology.

MAP uses a proven three-phased framework (Assess, Mobilize, and Migrate and Modernize) to help you achieve your migration goals. Through MAP, you can build strong AWS cloud foundations, accelerate and reduce risk, and offset the initial cost of migrations. Leverage the performance, security, and reliability of the cloud. Begin your journey today.

MAP offers AWS funding at each phase of the migration process, as well as significant discounts for several years after.

Through MAP, you can build strong AWS cloud foundations, accelerate and reduce risk, and offset the initial cost of migrations. Leverage the performance, security, and reliability of the cloud.
